

Long Drax Parish Council Chairs Annual Report 2022/23

Long Drax Parish Council has performed throughout with steady membership. A number of planning applications comprising of 2 residential and 8 industrial have been considered through the year and appropriate comments to the planning authorities. A number of Solar Farm and Carbon Reduction projects in the area have been commented on with attendance at several on line and physical presentations.

Following a request from a resident we have installed an AED (Automatic External Defibrillator) on the wall adjacent Corner Farm, funded by the Rusholme Windfarm Trust.

Although roads were named and signed a number of years ago, the road names were not on the royal mail data base. Working with SDC street names team, we have provided the required information to split the parish postcodes and put the road names into all the addresses on the database. This information will percolate into other company databases. This should make it easier for delivery drivers to locate properties.

We have managed to continue a good relationship with Drax Power Station and had our parish grass verges cut in the year at no cost.

We have made a contribution to the Coronation celebrations in Drax Village.
